

FCL-I/FCL-B series

High-Performance ATC/B-Axis Turn-Mill CNC Machining Center

FCL-I/FCL-B series

High-Performance ATC/B-Axis Turn-Mill CNC Machining Center

Force One Machinery proudly introduces the FCL-I/FCL-B Series, featuring FCL-20I (Index Positioning Series) and FCL-20B (B-Axis Servo Series). Both models come standard with an ATC 32T automatic tool changer, providing exceptional flexibility for multi-task machining. Additionally, the TS (Lower Turret Model) configuration is available as an option, further enhancing productivity and versatility.

FCL-20BTS

MACHINE FEATURES

INDEX CHUCK(OPT.)

Capable of turning multi-angle machining parts, such as tees and crosses, with automatic angle adjustment and complete processing at one time.

ROTATE QUILL TAILSTOCK(OPT.)

The higher rigidity rotate quill type tailstock has bigger bearings than live center.

HOLLOW BALL SCREWS WITH COOLANT SYSTEM (OPT.)

The hollow ball screw cooling system can significantly reduce the thermal temperature rise position accuracy error caused by screw friction during machine movement, thereby improving the positioning accuracy of the machine.

PARTS CUT-OFF DETECTOR (OPT.)

The detector is used for detecting if the part is completely cut off. It prevents cutting problems on twin spindles caused by cut-off failure.

HYDRAULIC STEADY REST (OPT.)

The standard hydraulic steady rest is manual base moving, there are programmable, and servo driven bases for options.

SUB SPINDLE (OPT.)

Synchronization for main and sub spindle. The workpiece can be machining at one time.

ESG (OPT.)

AUTOMATIC GREASE LUBRICATION SYSTEM

It significantly reduces lubricant usage, effectively reduces coolant tank pollution, and improves coolant quality.

VARIABLE FREQUENCY HYDRAULIC SYSTEM

Excellent energy saving effect, smaller fuel tank volume and temperature control.

SMART POWER-OFF SYSTEM

Smart power off system temporarily limits the use of power-hungry devices during standby. After processing is completed, the system can automatically power off the equipment.

AI (OPT.)

SMART MACHINE MONITORING AND PREVENTION SYSTEM

Real-time spindle load monitoring is combined with artificial intelligence software technology to automatically construct a safe processing load zone, and includes intelligent tool performance management to monitor and prevent abnormalities during processing, eliminating the need for human supervision.

OIL MIST COLLECTOR(OPT.)

The oil mist collector uses advanced separation technology to efficiently capture oil mist generated during machining, reducing air pollution and improving workshop environment quality. Recovered cutting fluids can be recycled, saving costs and extending equipment lifespan, making it the perfect blend of environmental and economic benefits.

DUST COLLECTOR(OPT.)

The dust collector is designed for efficient dust management, swiftly capturing fine particles and debris during machining to maintain a clean workspace, enhance machining accuracy, and improve operational safety. Its advanced filtration system ensures discharged air meets environmental standards, while also extending equipment lifespan, making it an ideal solution for maintaining a productive environment.

STANDARD ACCESSORIES

- 3 bar ~ 750w coolant pump
- Tools & tool box
- Heat exchanger for electrical cabinet
- Coolant tank
- Working light
- Three color alarm light
- Chip conveyor and bucket
- Automatic lubrication system
- Hydraulic unit

OPTIONAL ACCESSORIES

- Y-AXIS
- C-AXIS
- CE / TS electric control
- Automatic tool setter
- Main power transformer
- Automatic door & safety switch
- Automatic parts catcher
- Prevent crash installation of each axis (safety equipment)
- Bar feeder
- Parts cut off detector
- Larger hydraulic chuck
- Air conditioner for electrical cabinet
- Larger Spindle power
- High pressure coolant pump
- Oil mist collector
- Oil skimmer
- Manual / Hydraulic steady rest
- tailstock
- BMT type turret
